**Subject:** Dico Groundwater Extraction and Treatment Shut Down

The Raccoon River has risen to the point where the outlet pipe for the groundwater extraction and treatment at Dico is submerged underwater and water was spilling out of the stripping tower.

In response to this, the groundwater extraction and treatment system was shut down at approximately 10:00 AM today. The water level of the Raccoon River will be monitored and

when the outlet pipe is not submerged underwater the groundwater extraction and treatment system will be restarted.

I will send out a notification when the groundwater extraction and treatment system has been restarted.

**Brian Mills**
